

PROGRAM DESCRIPTION

Objective management constitutes “the head” of every business activity. In this VUCA times, with lot of volatility, uncertainty and complexity, objective management should be agile, enabling quick adaptation to the changing external and internal conditions. The vast majority of companies are nowadays operating in such conditions.

Therefore OKR goal setting framework, i.e. agile objectives management can be applied in various companies, at the different management levels, like e.g. department and teams, both for business objectives as well as for objectives in project and product management.
